

## Transcendent Media Platform V1.0

Basic Owners Edition & Deluxe Venue Edition

"Publish with purpose. Share with confidence."

### What It Is

Transcendent Media Platform (TMP) is a guest-centered media framework for WordPress. It empowers people to share images, audio, video, and reflections—without needing technical skills, and without giving up control.

It's a ready-to-license solution for software companies, platforms, and service providers who want to offer meaningful publishing tools to real people.

### Who Its For

- The small business owner who wants to showcase their work without hiring a web team
- The family historian who wants to preserve voices and photos in one place
- The venue that wants guests to contribute memories without friction
- The platform builder looking to integrate a media module that respects contributors

### What It Solves

- No learning curve: contributors don't need to know web design
- No clutter: layout adapts to what's submitted—images first, voice and video follow
- No surveillance: no tracking, no analytics, no third-party harvesting
- No confusion: clear upload limits, intuitive flow, and built-in structure

### Editions

#### Basic Owners Edition

For individuals and small business owners who want to publish directly. Includes gallery, reflection, and media playback.

## **Deluxe Venue Edition**

For organizations hosting multiple events or contributors. Adds dropdown navigation, taxonomy-based organization, and layout flexibility.

## **Upload Guidelines (Built-In)**

- Images: JPG, PNG, GIF, WEBP – max 1300px, 20MB total
- Audio: MP3, WAV, OGG – max 5 minutes, 25MB
- Video: MP4, WEBM – max 5 minutes, 25MB
- No collages or stitched media—each file stands alone

## **Hosting & Ownership**

All media is uploaded to the server hosting the TMP-powered website. Contributors retain full rights to their content. TMP does not track users or harvest data.

## **Integration Potential**

Transcendent Media Platform is built for integration. It works with:

- Elementor and other page builders
- Custom post types and taxonomies
- Headless WordPress setups
- Decentralized or privacy-first media frameworks

## **Licensing & Partnership**

TMP is not a plugin for hobbyists. It's a modular media platform ready to be licensed, white-labeled, or integrated into your product.

"Publish with purpose. Share with confidence."

That's the promise. Transcendent Media Platform delivers it.
